From the Revenue

No C 183 & 1413. 2. 19

In continuation of 214 forwards a statement showing the estimated output of principal food crops in the State during the current year.

17/2/19

The Rev Commr reports that while the requirements for a year are 36 lakhs of pallas of rice and 76 lakhs of pallas of rice, the supply available is only 16 lakhs of pallas of rice and 58 lakhs of pallas of dry grains and that it is very essential that food grains should be conserved and used economically and that concessions should be granted to encourage ryots to grow food crops not only in the lands in their holdings but in fall lands. As to the nature of the concessions, the R.C says he will advise later.

To

The Rev Commr in Mysore

Signed by.....

M. S. R. L.

Sir,

In ~~an~~ ~~am~~ ~~and~~ continuation
of this office letter no
414019 dated 10/1/19, I
am directed to forward
herewith the statement of
stocks of foodgrains
received from the D.C.
Kolar District.

J. H. H. H.
11/11/19
For Chief Secy
over.
M. S. R. L.

137

Hunsur	28000
Hassan	18000
Arsikere	28000
Chennarayapatna	19000
Hole Narsipur	18000
Arkalgud	19000
Kadur	53000
Tarikere	20000

The large decrease in stock in these Taluks is evidently due partly to the consumption during the 3 months since the last census of stock was taken and partly to the large supply sent from these Taluks to the other parts of the State. In about a dozen other Taluks the fall in the stock of ragi ranges from 5 to 14 thousand pallas. In the Taluks of Sidlaghatta, Pavagada, Shikaripur, Chellakere and Davangere, however, there is an increase of the stock of ragi by 7000, 18000, 9000, 7000 and 10000 pallas respectively. No explanation is given by the Deputy Commissioners for this increase. In the Taluks of Pavagada and Chellakere the increase seems to be due to the additions made to the stock from the new harvest of Nato ragi, while the increase shown in the other Taluks is due apparently to the greater care taken to obtain more accurate returns during the present census. In respect of paddy there is, as noted in the margin, a very considerable fall of stock in the Taluks of Yedatore, Kolar,

Yedatore	22000	Maddagiri, Pavagada, Belur, Chennarayapatna,
Kolar	7000	Sorab, Sagar, Nagar, Chikmagalur, Koppa,
Maddagiri	8000	Mudgere and Narasimharajpur without any
Pavagada	7000	corresponding increase of stock of rice. In
Bellur	17000	the Shikaripur and Thirthahalli Taluks, how-
Chennarayapatna	8000	ever, there is an increase of 27000 and
Sorab	192000	7000 pallas respectively of paddy. The
Sagar	36000	
Nagar	11000	
Chikmagalur	10000	
Koppa	13000	
Mudugere	19000	
Narasimharajpur	14000	

present census being based on figures furnished by stock holders -- mostly on solemn declarations may be taken to represent the actual stock on hand.

3. Under requirements calculated at $\frac{1}{2}$ a palla for 3 months per head of the population, the Deputy Commissioners have made provision for the population according to the khaneshmari accounts which, however, falls short by nearly $2\frac{1}{2}$ lakhs of that of the census of 1911. There does not also seem to be any uniform principle adopted in all the Districts in calculating the percentages of population that subsist on rice or ragi, jola and other dry grains. If we take the population according to the census of 1911 and assume that 25% of the people consume rice and the remaining 75% ragi, jola and other dry grains, it will be seen from the annexed statement that the Shimoga District shows a plus balance of 21910 pallas of rice, that the Bangalore, Kolar, Tumkur and Chitaldrug Districts show a plus balance under ragi and other dry grains and that for the whole State there is a minus balance of 379604 pallas of rice and of 295182 pallas of ragi and other dry grains. This deficit will have to be met from the current harvests. The situation was, however, anticipated and information called for from the Deputy Commissioners -- regarding the approximate estimated acreage and outturn of different crops in the current year with a view to ascertain how far the yield would supplement the stock on hand and meet the requirements of the population till the next harvest. From information so far received from some of the Districts, it is seen that, owing to unfavourable season conditions, there has been not only a considerable fall in the area under cultivation as compared with that in normal years but also a decrease in the estimated outturn. Under the circumstances, the question of making available sufficient food stuffs till the next harvest is ~~indeed~~ one of anxiety. The situation will, however, be again reviewed and a further report submitted to Government on -- receipt of information from all the Deputy Commissioners as regards the estimated outturn of the present harvests.

4. The enclosures to your letter are returned herewith.

I have the honor to be,
Sir,
Your most obedient servant,

For me
Revenue Commissioner.

No- C 1831ge
LO

From

K. R. Srinivasiengar, Esquire., M.A.,
Revenue Commissioner in Mysore.

To

The Chief Secretary to the Government of
His Highness the Maharaja of Mysore,
Bangalore.

Sir,

In continuation of my letter No.F.C.66 dated the 17th January 1919 submitting a report on the census of the stock of principal food grains in the State taken in December last, I have the honor to forward herewith statement No.A. (with enclosures 1 to 8) showing the estimated acreage and outturn of principal food crops during the current year in each Taluk together with a consolidated Districtwar statement.

The figures showing the acreage and yield under different crops for the three years 1915-16, 1916-17 and 1917-18 have been also entered in the statements for purposes of comparison.

RAGI.

2. It will be seen from these statements that, during the year, there was an increase both in the acreage and the estimated outturn of this crop in the Taluks of Chennapatna, Closepet (Sub Taluk), Chamarajanagar, T. Narsipur, Malavalli, Krishnarajapet, Nagamangala, Kumsi (Sub Taluk) and Molakalmuru as compared with the figures for the past three years. In the Taluks of Mandya and Krishnarajapet, though the area under this crop slightly fell, there has been an increase in the total estimated yield. In the marginally noted Taluks though there was some increase

Bangalore, Magadi, Nelamangala Kankanhalli, Bowringpet, Chik- ballapur, Malur, Kunigal, Yedatore and Arsikere.	less than the average. In all the other Taluks there was, owing to absence of timely rains, a
---	--

considerable shrinkage both in the area under the crop and the estimated outturn. From a reference to the consolidated statement (A) it will be seen that the total area under Ragi fell by about 10% (from about 23 to 21½ lakhs of acres) and the estimated yield by more than 50% (from 63 lakhs of pallas to 30½ lakhs). The Districts of Kolar, Shimoga, Kadur and Chitaldrug have -- fared worst, the estimated yield of this crop in these Districts being less than one-third of the average. The estimated yield in the Bangalore, Tumkur and Hassan Districts is between half and one-third of the average. The Mysore District alone shows an increase of about 1½ lakhs of pallas (about 20%) over the average.

PADDY.

3. Under paddy, there has been an increase in the estimated yield in the Mysore, Seringapatam, Yedatore, T. Narsipur, Malavalli, Mamdya, Manjarabad, Thirthahalli and Koppa Taluks as compared with the three years' average. The increase in the outturn in the Taluks of the Mysore District was due to the additional area brought under wet cultivation under the new channels and also to the fact that most of the lands in these Taluks are irrigated by river-fed channels. In the Taluks of Shimoga and Tarikere and in the Kumsi Sub Taluk a larger area was cultivated with paddy; but the crop turned out to be almost a complete failure. In the remaining Taluks, both the acreage under paddy and the estimated outturn have considerably fallen as the South-West Monsoon failed in the Malnad and the tanks nowhere received a sufficient supply in Maidan Districts. The total area cultivated with paddy for the whole State was about 7½ lakhs of acres as against an average of about 8 lakhs of acres for the past three years: and the estimated yield was 25½ lakhs of pallas against an average of 42 lakhs of pallas.

JOLA.

4. The total area under Jola was 580,612 acres and the total estimated yield 779,206 pallas as against an average of 637,518 acres and 1,124,133 pallas respectively. Very little of this crop is grown in the Bangalore and Kolar Districts. Among the other Districts, there was an increase in the area as well as the estimated outturn in the Tumkur District. In the Hassan and Chitaldrug Districts there was an increase in the area but fall in the total outturn owing to the poverty of the crop. The other Districts show a fall in the area as well as the yield, the fall in the yield being proportionately larger than that in the area. I may state here that it was brought to my notice in the course of my visit to the Chitaldrug District that since the returns for the District were sent up, the Jolam crop had suffered very badly by the appearance of some disease and that in consequence it was not expected to yield more than a four-anna crop on the average, though when the returns were sent up the crop had been estimated to yield a full harvest.

HORSE-GRAM.

5. Owing to the failure of the early and timely rains, horse-gram (which is a late crop) was largely grown instead of Ragi and in many places the fields sown with ragi were resown with horse-gram as the ragi crop had completely withered and died out. The total area cultivated with horse gram during the year was about 10 lakhs of acres as against an average of $7\frac{1}{2}$ lakhs and the estimated yield 12 lakhs of pallas against an average of $6\frac{1}{2}$ lakhs. The increase is distributed over all the Districts except Shimoga and is greatest in the Districts of Mysore, Tumkur and Kolar.

NAVANE.

6. This has been largely grown in the Districts of Chitaldrug, Tumkur, Shimoga and Kadur. The total area under the crop was about 137,000 acres with an estimated yield of about 178,000 pallas. It is not possible to say how this compares with the area and yield of this crop in previous years, as information in respect of this crop is not available in the Season and Crop ~~1930-31~~.

7. The result of the Census of Food Stock in the State taken in the beginning of December last has already been reported to Government with my letter No.F.C.66 dated the 17th January 1919 referred to in para 1 above. The total quantity of food stock in the State as determined at the December census, the estimated yield during the current year and the quantity that would be required for annual consumption in each District are given in the appended statement (B). For the purposes of calculating the requirement of the several food grains in each District, one-third of the population has been taken as requiring rice in the Districts of Bangalore, Kolar, Mysore and Kadur which contain a large rice-eating population in the Cities and the Gold Fields and the Malnad Taluks of Kadur District; half the population in the Shimoga District which is mostly Malnad; 25% in the Districts of Hassan and Tumkur and 20% in the Chitaldrug District. It will be seen from a reference to this statement that according to the above calculation and taking the average consumption per head at 2 pallas a year the supply of dry food grains is in excess of a year's requirement only in the Bangalore District and that in all the other Districts there is a considerable shortage both of rice as well as the dry grains.

8. Taking the total of all the Districts, for a population of 57 lakhs which requires 36 lakhs of pallas of rice and 78 lakhs of pallas of ragi, the supply available in the State in December last according to the recent census together with the estimated production of the year, is only 16 lakhs of pallas of rice and 58 lakhs of dry grains. This can last for about only 7 or 8 months (from December last) and even making some allowance for under-estimation in the census figures of last December there can be no doubt that there will be a considerable deficit in the stock required before the next year's harvest can come in. How this deficiency is to be made up is a matter requiring very serious consideration. It is of the utmost importance that public co-operation should be enlisted in this connection by

.5.

giving them a clear idea of the seriousness of the situation and by impressing on them the necessity for conserving and making economical use of all available food stuffs. It is also very essential that the production of food grains, particularly quick-growing crops should be stimulated in all possible ways. The ryots will have to be induced, by suitable concessions, not only to take up Government lands for temporary cultivation of food grains as soon as the Mungar rains set in but also to grow food crops in preference to other crops on lands already in their holdings. As regards the exact nature of the concessions which may be granted in this respect and the other measures which may be adopted to secure the object in view, I shall -- separately submit my proposals in consultation with the Deputy Commissioners.

I have the honor to be,

Sir,

Your most obedient servant,

J. S. Anand
Revenue Commissioner.

R. C. 4

59129
1919
20 FEB. 1919

From

The Revenue Commissioner in Mysore.

To Chief
The Secretary to the Government of
H. H. the Maharaja of Mysore,
~~Department.~~

Dated 18th February 1919.

Despatched 19.

Received

General No. C1831

Enclosure No. 2

SUBJECT.

Re the statements of
estimated acreage and outturn of
principal food crops during the
current year submitted to Govern-
ment with my letter No.C.1831
Gl. dated the 13th February 1919,
etc.

OFFICE OF THE REVENUE COMMISSIONER
IN MYSORE.

No.

Bangalore, 18th February 1919.

FROM

14462

K.R. Srinivasiengar, Esquire, M.A.,

Revenue Commissioner in Mysore.

To

Chief
The Secretary to the Government of
His Highness the Maharaja of Mysore,

~~Department~~

SIR,

I have the honour to state that, in the statements of estimated acreage and outturn of principal food crops during the current year submitted to Government with my letter No.C.1831 Gl. dated the 13th February 1919, particulars relating to the portion of the Krishnarajapet Taluk under the Deputy Amildar's jurisdiction were not included as the same had not been received at the time. Information has since been received and some of the figures already furnished require correction. I am arranging to get the statements for all the Districts printed after incorporating all the corrections and shall submit the printed copies as soon as they are received. In the meanwhile, I request that the marginally noted figures may be kindly substituted for the red ink figures in the statements already submitted for the Krishnarajapet Taluk, Mysore District, and grand total for the State in the statement A.

As these revised figures will involve slight amendments in the covering letter as well as in statement B, I enclose herein revised copies of the same for being kindly substituted for those already sent.

I have the honour to be,
Sir,
Your most obedient servant,

K.R. Srinivasiengar
Revenue Commissioner.

R.R.
1919

(vide overleaf)

Revised.

No. 183/88

Office of the Revenue Commissioner in Mysore,

Dated Bangalore, the 12th February 1919
/3

From

K. R. Srinivasiengar, Esquire., M.A.,
Revenue Commissioner in Mysore.

To

The Chief Secretary to the Government of
His Highness the Maharaja of Mysore,
Bangalore.

Sir,

In continuation of my letter No.F.C.66 dated the 17th January 1919 submitting a report on the census of the stock of principal food grains in the State taken in December last, I have the honor to forward herewith statement No.A. (with enclosures 1 to 8) showing the estimated acreage and outturn of principal food crops during the current year in each Taluk together with a consolidated Districtwar statement.

The figures showing the acreage and yield under different crops for the three years 1915-16, 1916-17 and 1917-18 have been also entered in the statements for purposes of comparison.

RAGI.

2. It will be seen from these statements that, during the year, there was an increase both in the acreage and the estimated outturn of this crop in the Taluks of Chennapatna, Closepet (Sub Taluk), Chamarajanagar, T. Narsipur, Malavalli, Krishnarajapet, Nagamangala, Kumsi (Sub Taluk) and Holakalmuru as compared with the figures for the past three years. In the Taluk of Mandya, ~~and Krishnarajapet~~, though the area under this crop slightly fell, there has been an increase in the total estimated yield. In the marginally noted Taluks though there was some increase

in the acreage under this crop, the outturn was considerably Bangalore, Magadi, Nelamangala Kankanhalli, Bowringpet, Chik- ballapur, Malur, Kunigal, Yedatore and Arsikere.	less than the average. In all the other Taluks there was, owing to absence of timely rains, a
---	--

considerable shrinkage both in the area under the crop and the estimated outturn. From a reference to the consolidated statement (A) it will be seen that the total area under Ragi fell by about 10% (from about 23 to 21½ lakhs of acres) and the estimated yield by more than 50% (from 63 lakhs of pallas to 30½ lakhs). The Districts of Kolar, Shimoga, Kadur and Chitaldrug have -- fared worst, the estimated yield of this crop in these Districts being less than one-third of the average. The estimated yield in the Bangalore, Tumkur and Hassan Districts is between half and one-third of the average. The Mysore District alone shows an increase of about 1½ lakhs of pallas (about 20%) over the average.

PADDY.

3. Under paddy, there has been an increase in the estimated yield in the Mysore, Seringapatam, Yedatore, T. Narsipur, Malavalli, ^{Krishnarajpet} Mandya, ^{de} Manjarabad, Thirthahalli and Koppa Taluks as compared with the three years' average. The increase in the outturn in the Taluks of the Mysore District was due to the additional area brought under wet cultivation under the new channels and also to the fact that most of the lands in these Taluks are irrigated by river-fed channels. In the Taluks of Shimoga and Tarikere and in the Kumsi Sub Taluk a larger area was cultivated with paddy; but the crop turned out to be almost a complete failure. In the remaining Taluks, both the acreage under paddy and the estimated outturn have considerably fallen as the South-West Monsoon failed in the Malnad and the tanks nowhere received a sufficient supply in Maidan Districts. The total area cultivated with paddy for the whole State was about 7½ lakhs of acres as against an average of about 8 lakhs of acres for the past three years: and the estimated yield was 25½ lakhs of pallas against an average of 42 lakhs of pallas.

JOLA.

4. The total area under Jola was 580,612 acres and the total estimated yield 779,206 pallas as against an average of 637,518 acres and 1,124,133 pallas respectively. Very little of this crop is grown in the Bangalore and Kolar Districts. Among the other Districts, there was an increase in the area as well as the estimated outturn in the Tumkur District. In the Hassan and Chitaldrug Districts there was an increase in the area but fall in the total outturn owing to the poverty of the crop. The other Districts show a fall in the area as well as the yield, the fall in the yield being proportionately larger than that in the area. I may state here that it was brought to my notice in the course of my visit to the Chitaldrug District that since the returns for the District were sent up, the Jolam crop had suffered very badly by the appearance of some disease and that in consequence it was not expected to yield more than a four-anna crop on the average, though when the returns were sent up the crop had been estimated to yield a full harvest.

HORSE-GRAM.

5. Owing to the failure of the early and timely rains, horse-gram (which is a late crop) was largely grown instead of Ragi and in many places the fields sown with ragi were resown with horse-gram as the ragi crop had completely withered and died out. The total area cultivated with horse gram during the year was about 10 lakhs of acres as against an average of $7\frac{1}{2}$ lakhs and the estimated yield 12 lakhs of pallas against an average of $6\frac{1}{2}$ lakhs. The increase is distributed over all the Districts except Shimoga and is greatest in the Districts of Mysore, Tumkur and Kolar.

NAVANE.

6. This has been largely grown in the Districts of Chitaldrug, Tumkur, Shimoga and Kadur. The total area under the crop was about 137,000 acres with an estimated yield of about 178,000 pallas. It is not possible to say how this compares with the area and yield of this crop in previous years, as information in respect of this crop is not available in the Season and Crop Report.

7. The result of the Census of Food Stock in the State taken in the beginning of December last has already been reported to Government with my letter No.F.C.66 dated the 17th January 1919 referred to in para 1 above. The total quantity of food stock in the State as determined at the December census, the estimated yield during the current year and the quantity that would be required for annual consumption in each District are given in the appended statement (B). For the purposes of calculating the requirement of the several food grains in each District, one-third of the population has been taken as requiring rice in the Districts of Bangalore, Kolar, Mysore and Kadur which contain a large rice-eating population in the Cities and the Gold Fields and the Malnad Taluks of Kadur District; half the population in the Shimoga District which is mostly Malnad; 25% in the Districts of Hassan and Tumkur and 20% in the Chitaldrug District. It will be seen from a reference to this statement that according to the above calculation and taking the average consumption per head at 2 pallas a year the supply of dry food grains is in excess of a year's requirement only in the Bangalore District and that in all the other Districts there is a considerable shortage both of rice as well as the dry grains.

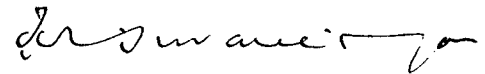

8. Taking the total of all the Districts, for a population of 57 lakhs which requires 36 lakhs of pallas of rice and 78 lakhs of pallas of ragi, the supply available in the State in December last according to the recent census together with the estimated production of the year, is only 16 lakhs of pallas of rice and 58 lakhs of dry grains. This can last for about only 7 or 8 months (from December last) and even making some allowance for under-estimation in the census figures of last December there can be no doubt that there will be a considerable deficit in the stock required before the next year's harvest can come in. How this deficiency is to be made up is a matter requiring very serious consideration. It is of the utmost importance that public co-operation should be enlisted in this connection by

giving them a clear idea of the seriousness of the situation and by impressing on them the necessity for conserving and making economical use of all available food stuffs. It is also very essential that the production of food grains, particularly quick-growing crops should be stimulated in all possible ways. The ryots will have to be induced, by suitable concessions, not only to take up Government lands for temporary cultivation of food grains as soon as the Mungar rains set in but also to grow food crops in preference to other crops on lands already in their holdings. As regards the exact nature of the concessions which may be granted in this respect and the other measures which may be adopted to secure the object in view, I shall -- separately submit my proposals in consultation with the Deputy Commissioners.

I have the honor to be,

Sir,

Your most obedient servant,

Revenue Commissioner.

R.T.R.

Statement showing the totals of stock of food grains as per census of December 1918 and the estimated yield of the current harvest and the requirements of the population for 12 months.

M. 134-18
Serial 379

Proceedings of the Government of H.H.
the Maharaja of Mysore.

Read:--

Paragraph 5 of Govt. Order No. G.
8450-512/P.P. 134-18-1, dated 11th Nov.
1918, directing that immediate action be
taken for a census of stock of food grains
in the State.

2. Letter No. F.C. 66 dated the 14/17th
Jan. 1919, from the Revenue Commissioner
in Mysore, submitting a consolidated state-
ment of the stock of food grains in the
State as a result of the census taken on
the 10th Dec. 1918.

3. Letter No. C. 1831, dated 12/13th
Feb. 1919, from the same officer submitting
details of the estimated outturn of the new
harvest in the current year.

4. Letter No. C. 1831, dated the 18/19th
Feb. 1919, from the same officer on the
subject. (Communications 2 to 4 to be
printed in extenso.)

Order:-

Recorded.

2. The stocks of food grains according
to the census taken on the 10th Dec. 1918
were as follows:--

Rice. (Pallas.)	Ragi (Pallas.)	Jolam (Pallas.)	Navane. (Pallas.)
306493	1578874	151191	36044

The new harvest has been estimated to yield
(in pallas.)

Rice	Ragi	Jolam	Navane.
1289134	3077817	779470	178416

The total quantities (in pallas) of the several

2.

grains this available for consumption are as follows:--

Rice.	Ragi.	Jolam	Navane.
1595627	4656691	900001	214460

3. From the above figures it will be observed that the supply of food grains available in the State would be sufficient for only 7 or 8 months at the most and that it cannot possibly last till the next harvest.

4. To meet the deficit, it is absolutely necessary that suitable measures should be adopted. The necessity for conserving and making economical use of the available supply of food stuffs should be brought home to the minds of the public. It is necessary to import rice from outside to supplement the existing stock and Govt. have already taken action in this direction. ^{also} It is very necessary that immediate action should be taken to stimulate the cultivation of quick growing crops.

The Revenue Commissioner will be good enough to submit definite proposals in consultation with the Director of Agriculture who has already taken steps in this behalf as to what further measures should be adopted towards this end.

Stocks of Food Grains.

No. G. 19498-512—P. P. 134-18-379, DATED 5TH MARCH 1919.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Paragraph 5 of Government Order No. G. 8450-512—P. P. 134-18-1, dated 11th November 1918, directing that immediate action be taken for a census of stock of food grains in the State.

2. Letter No. F. C. 66, dated the 14—17th January 1919, from the Revenue Commissioner in Mysore, submitting a consolidated statement of the stock of food grains in the State as a result of the census taken on the 10th December 1918.

3. Letter No. C. 1831, dated 12—13th February 1919, from the same officer submitting details of the estimated outturn of the new harvest in the current year.

4. Letter No. C. 1831, dated the 18—19th February 1919, from the same officer on the subject.

Order No. G. 19498-512—P. P. 134-18-379, dated 5th March 1919.

Recorded.

2. The stocks of food grains (in pallas) according to the census taken on the 10th December 1918 were as follows :—

Rice.	Ragi.	Jolam.	Navane.
3,06,493	15,78,874	1,51,191	36,044

The new harvest has been estimated to yield (in pallas).

Rice.	Ragi.	Jolam.	Navane.
12,89,134	30,77,817	7,79,470	1,78,416

The total quantities (in pallas) of the several grains thus available for consumption are as follows :—

Rice.	Ragi.	Jolam.	Navane.
15,95,627	46,56,691	9,30,661	2,14,460

3. From the above figures it will be observed that the supply of food grains available in the State would be sufficient for only 7 or 8 months at the most and that it cannot possibly last till the next harvest.

4. To meet the deficit, it is absolutely necessary that suitable measures should be adopted. The necessity for conserving and making economical use of the available supply of food stuffs should be brought home to the minds of the public. It is necessary to import rice and broken rice from outside to supplement the existing stock and Government have already taken action in this direction.

5. It is also very necessary that immediate action should be taken to stimulate the cultivation of quick growing crops. The Revenue Commissioner will be good enough to submit definite proposals in consultation with the Director of Agriculture who has already taken steps in this behalf as what further measures should be adopted towards this end.
